## EXPERIENCE

### FidelityTech, Lagos — Intern

April 2021 - Present

- Created websites and landing pages from concept using React, through deployment.
- Fetched data from different API servers and manipulated parameters to suit different functionalities.
- Created a fake REST API using JSON
- Collaborated with product team members to implement new feature developments
- Used Git for version control and saved personal projects in repositories.
- Connected Git to Netlify to enable Continuous Deployment of any changes made to the website.
